French Trade Catalogues: Material Culture of France, 1860 - 1960

Welcome to the eighth of a series of occasional lists of material from my varied stock that I have issued over the past year (2020-2021). Previous lists covered Printing & Typography, Health & Medicine [in two parts], Transportation, World’s Fairs & Expositions (1851-1898) as well as three miscellaneous offerings [E-Lists Nos. 4, 6, and 7]. Illustrated versions of these catalogues may be found on my website.

Once the “fog of the pandemic” lifts over the land, I plan on returning to Europe and renewing my scouting activities there. As usual, I welcome inquires or wish lists from collectors and institutions.

Thank you for your time and attention.

Marc Selvaggio

[20] pp + highly stylized blind embossed art-deco designed illustrated wrappers, signed in illustration by Roberts (and also with his name blind-stamped on rear cover). Wrappers trimmed (intentionally) 1 cm all around from body text. Slight scuffing on rear wrapper, otherwise a very good, bright copy. ¶ Fancy catalogue from this high-end chocolatier which was located near the Place de la Concorde, with eight photographs by Lorelle and printed as heliotypes by Théo Brugiére. Not located in OCLC.

2. [Agriculture] **Tatin, A. Catalogue Raisonné d'après les meilleurs principes économiques utile aux cultivateurs.** Contenant tous les graines potageres, de fleurs, de fourrages, oignons de fleurs, griffes, pattes [sic], differns plants, arbes, fruitiers, arbres & arbrisseaux d'agrément, & graines d'arbres, qui composent le commerce du sieur Tatin, marchand grainier-fleuriste, à la Garantie, place du quai de l'École, à Paris. Very slight evidence of some old damp stain at top of title and to page 16, otherwise clean, clear copy with original stitching, housed in a modern (appropriate) green silk-covered case. ¶ Rare first edition of a trade catalogue from a Parisian seed merchant and florist who presented here, shortly after the start of the French Revolution, his thoughts on the planting and growing of vegetables and fruits. The last page [96] has a table of contents as well as a postscript from M. Tatin informing the reader that his products may be purchased at his home, but availability depended much on “la rigueur des hivers” [the harshness of the winters]. OCLC notes three holdings of this edition: British Library with an undated issue noted as “95p”; Musée Nationale d'Histoire Naturelle, Paris, dating 1790, and noted as “95p”; and undated copy at the BNF, but with pagination as “96p”. Tatin revised/reissued the work in 1795 in a smaller format (10x16.8 cm) of 165pp, and at which time he was now calling himself “citoyen Tatin.”

4. [Appliance] **Fonderies d’Hirson.** *Manufacture d’Appareils de Chauffage.* Vervins: A. Flem, 1894. 23 cm. 104pp + stiff printed boards over cloth spine; old and faint damp stain on covers, but not at all in contents. Some manuscript notes from the company. A few folds otherwise very good. ¶ Large colorful broadside promoting Sand’s line of decorative tile work, illustrated here with 20 mounted color printed samples + an additional 12 samples of decorative borders (also mounted), with the samples presented at 1:10 ratio. 12. [Architecture] Revêtements “Josz”. *Les Revêtements Décoratifs “Josz.”* No place or date, ca. 1900. Embossed pictorial cover leaf (on heavy stock) + 1ff text (both sides) + 23ff, with color embossed samples printed on one side, and the company’s advertising image (of a woman sponging down a “Josz” wall) on verso. OCLC directs one only to a digitized version of a different edition (e.g., a larger format but also 24ff) from the Canadian Centre for Architecture, and dating that piece as 193-? I think they are earlier—the company began in 1885—and the styles on the sheets are very art-nouveau. As with the CCA copy, the numbering of samples on the plates in my copy is not consistent—perhaps assembled upon request? Nevertheless, an attractive promotional piece for this line of embossed enameled metal sheets to be used on walls and ceilings, much like the ceramic tiles.

13. [Art] Jacquet. *Platres Antiques.* [Paris: C. Ballard, n.d., ca. 1820?]. 19 cm. 8pp, stitched. Manuscript addition at bottom of p.1. Also includes results of various races and some very eager testimonials. A rare surviving piece from a short-lived firm—its life span was 1921-1927, and it specialized in building small “cyclecars” models. Not located in OCLC; although BNF does have three press photos for the Benjamin car from 1922 posted on the BNF digital site.

Excellent catalogue of the range of wooden furniture then being fabricated in Paris, from a printer located on the outskirts of town, at 58 Faubourg St. Antoine. Quetin’s office was located, in fact, on the third floor of a building whose other tenants included at least three furniture makers (and the block held even more). In fact, Quetin printed the billhead for the firm of Puard-Gouffé, located in the building, and he decorated that sheet with four small wood-cuts. Quetin issued a number of illustrated catalogues in his *Magasin de Meubles* series over a period of years, with some of the later numbers printed in chromolithography (this early volume is only plain lithography). Every sort of piece is shown and captioned, from tables, chairs, toilettes (some with bidets built in and many with attached mirrors), beds, armoires, buffets, to desks, book cases, and other pieces.

OCLC notes only the Getty and Smithsonian copies of this issue, with this entry: “Undated, but published sometime in the latter half of the 19th century. The series *Magasin de meubles* was published ca. 1850 to ca. 1880. The plates are numbered from 1 to 94, with the following numbered plates added in the sequence: 10 bis; 11 bis; 12 bis; 13 bis; 16 bis; 22 bis; 23 bis; 25 bis; 32 bis; 40 bis; 55 bis; 69 bis; 82 bis; and 87 bis. Includes index.” My copy does not have [4]pp preliminary to the plates as noted in OCLC—nor is there any evidence of those leaves having even been present herein. However, this copy does have two extra plates—67 bis and 81 bis— not noted in the OCLC collation.
